# Maguire

Maguire Refining, Inc. is the premier precious metal refiner in the Midwest.

We are blessed to have a trustworthy, experienced staff to maximize your scrap return in serving you.

Prompt, precise returns are hallmark traits of Maguire Refining. We assay for gold, platinum, palladium and silver. We handle high grade solids and low grade sweeps.

Shown on the back cover is an analytical balance beam scale used over a half century ago by an uncle of mine. Note the delicate sample weighing trays glassed inside a vintage antique hardwood scale used by Uncle George for assays.

The scale is a balance for trade and an ageless symbol indicating trust. We strive to maintain a fair balance to ensure accurate returns. Let us earn your trust. Please try our refining services if you have not done so.
